Review Item	Result
Gemini Fit Score	90/100
Skill Match Score	100/100
Matched Skills	6
Missing Skills	0

Summary

Dharmik, your resume shows a great fit for this Entry-Level Data Analyst role. You have strong skills in SQL, Excel, Tableau, Power BI, and Python, all directly requested or helpful for the position. Your project experience also demonstrates your ability to clean, analyze, visualize data, and explain insights, which aligns perfectly with the job responsibilities.

Skills Review

Category	Skills
Resume Skills	Dashboard, Data Cleaning, Data Visualization, Excel, Power BI, Presentation, Python, SQL,
Job Skills	Dashboard, Excel, Power BI, Python, SQL, Tableau
Matching Skills	Dashboard, Excel, Power BI, Python, SQL, Tableau
Missing Skills	No missing skills found.

Resume Improvement Suggestions

- Add specific metrics or numbers to your "AEMR Energy Analysis Project" to quantify your impact (e.g., "analyzed X rows of data," "identified Y key trends leading to Z potential savings").
- Consider adding a brief professional summary at the top of your resume to quickly highlight your strongest skills and career aspirations.
- Elaborate on your "Portfolio" section by providing brief descriptions of 1-2 additional projects, showcasing different datasets or challenges you've tackled.

Project Idea to Improve Fit

Customer Churn Analysis & Predictive Dashboard

Use a public dataset (e.g., from Kaggle) of customer data to identify factors leading to churn. Clean and analyze the data using SQL and Python. Build an interactive dashboard in Tableau or Power BI to visualize churn trends and predict potential churners. Create a concise report explaining your findings and actionable recommendations for a business.

Suggested tools: SQL, Python, Tableau, Power BI, Excel

7-Day Action Plan

Day 1: Refine your resume by adding quantifiable achievements to your projects and drafting a professional summary.

Day 2: Practice SQL queries focused on common data cleaning, aggregation, and analysis tasks relevant to business data.

Day 3: Build a practice dashboard in Tableau or Power BI using a sample dataset, focusing on creating clear, insightful visualizations and reports.

Day 4: Research common data analyst interview questions, including technical concepts and behavioral questions, and practice your responses.

Day 5: Begin gathering a public dataset for the "Customer Churn Analysis" project and start cleaning/exploring the data.

Day 6: Focus on the analytical part of your project, identifying trends and building the dashboard in your chosen tool (Tableau/Power BI).

Day 7: Complete the project by preparing a short report outlining your key findings, insights, and business recommendations.

Honesty Note

This feedback is based solely on the information provided in your resume and the job description.
